

We built DropCar to connect automotive service centers to customers.

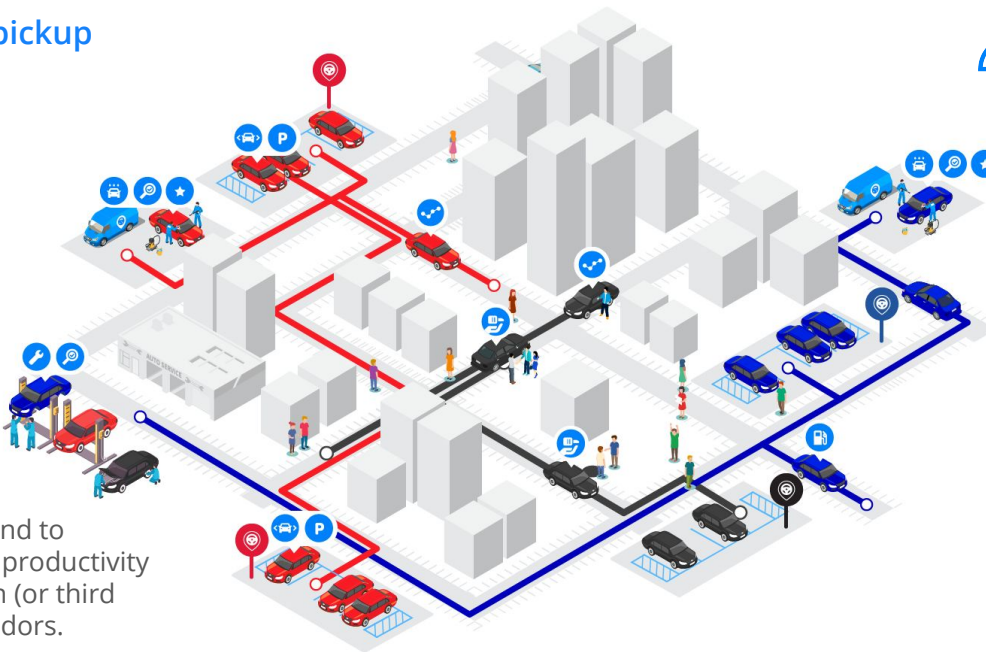

Mobility as a Service (MaaS) fleets & front door auto services are on the rise, but ultimately must minimize operating costs while maximizing productivity in order to thrive.

Simple, efficient vehicle pickup & delivery automation.

Our Mobility Cloud platform, with integrated driver mobile app, brings total transparency to dealer operations in real time while automatically digitizing high value data.

Vehicle Lifecycle & Vendor Management

Our virtual coordinators can manage your mobility needs end to end, including maximizing the productivity and accountability of your own (or third party) drivers and support vendors.

Driver & Support Partner Ecosystem

Outsource your field operations to our network of drivers. Or, use these resources to compliment your own infrastructure and to build new products and services for your end clients.

A solution to maximize economic efficiencies with greater driver accountability.

Plug & play **fixed operations automation** that works with your existing solutions.

Many Fleet & Fixed Ops Solutions

- Help create & track repair orders
- Monitor fuel consumption
- Provide basic route guidance
- Manage warranties & policies
- Manage damage claims
- Manage basic asset tracking

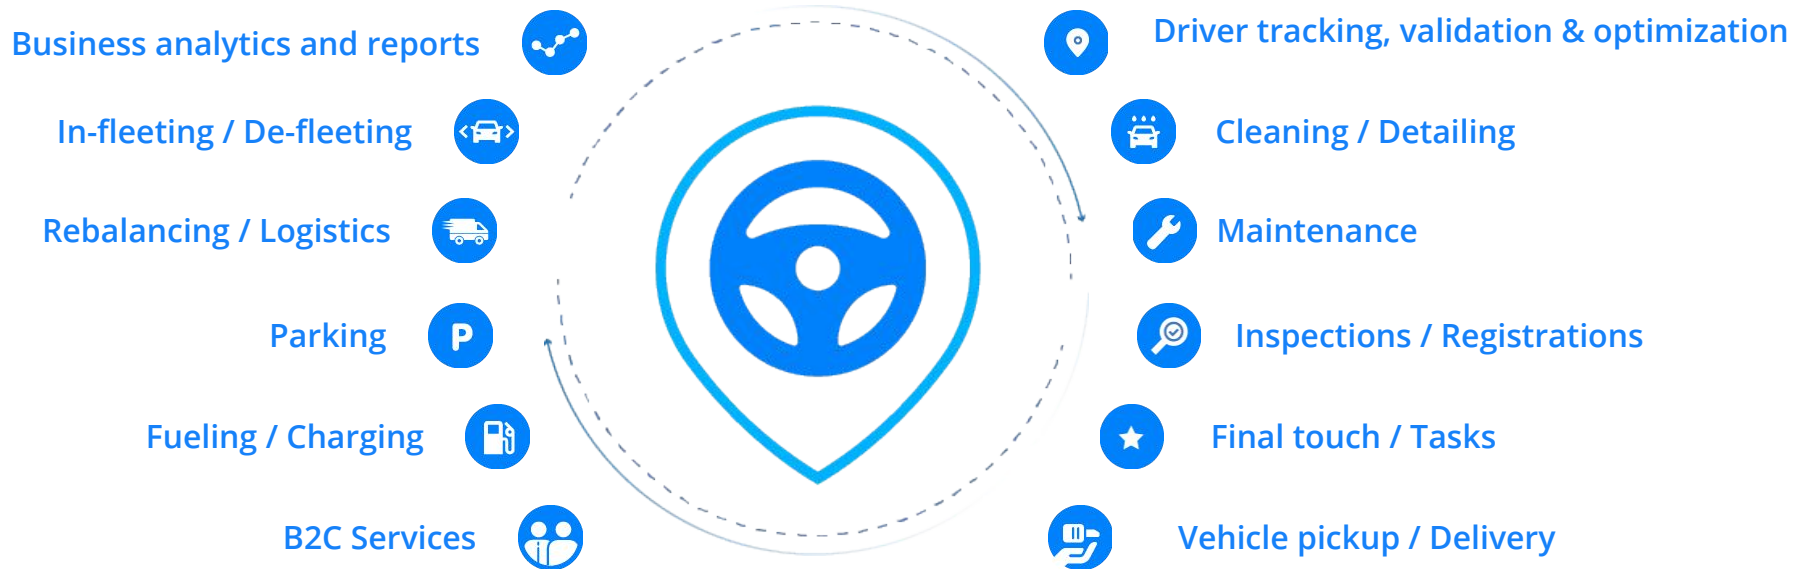

But, They Don't

- Source & manage your drivers for you (driver marketplace)
- Automate your dispatch & logistics (more reliable & cost effective)
- Measure operations performance in real-time with actionable reporting
- Simplify driver decision making (minimizing excess labor, fuel, etc. costs)
- Leverage photo authentication to verify vehicle conditions, assets, etc.
- Digitally document & securely store all parts of your operations
- Provide "bolt on" consumer technology that enables you to launch new fleet and/or partner ecosystem driven services (ie. mobile mechanic, parking & car concierges services on demand, etc.)

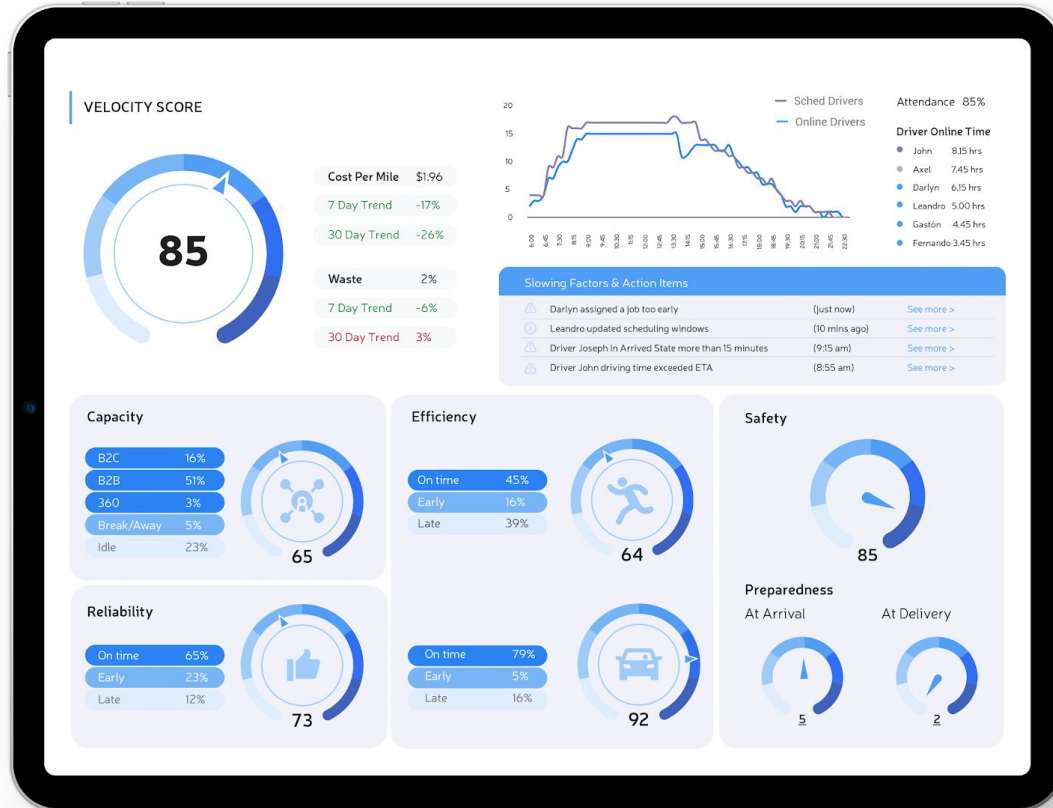

Our mission: **100% efficiency, 100% accountability**

Dealership Vehicle Lifecycle & Vendor Management

How Fast Are You Moving?

Improve Fixed Service Operations & Accountability

Example KPIs & Benchmarking

- Cost per Mile
- On-Time/ETA Performance
- Velocity/Throughput
- Driving Quality
- Project Execution (Arrival, Time-to-Key, etc.)
- Damage Rates
- Vendor Efficiency & Bandwidth

Slice Data by

- Bill of Lading (BOL)
- Driver
- Location (Origin, Destination)
- Transportation Type (Truck, Valet)
- Time of Day, Day of Week
- Vehicle Type
- Carrier/Vendor
- Custom Data (Tesla APIs)

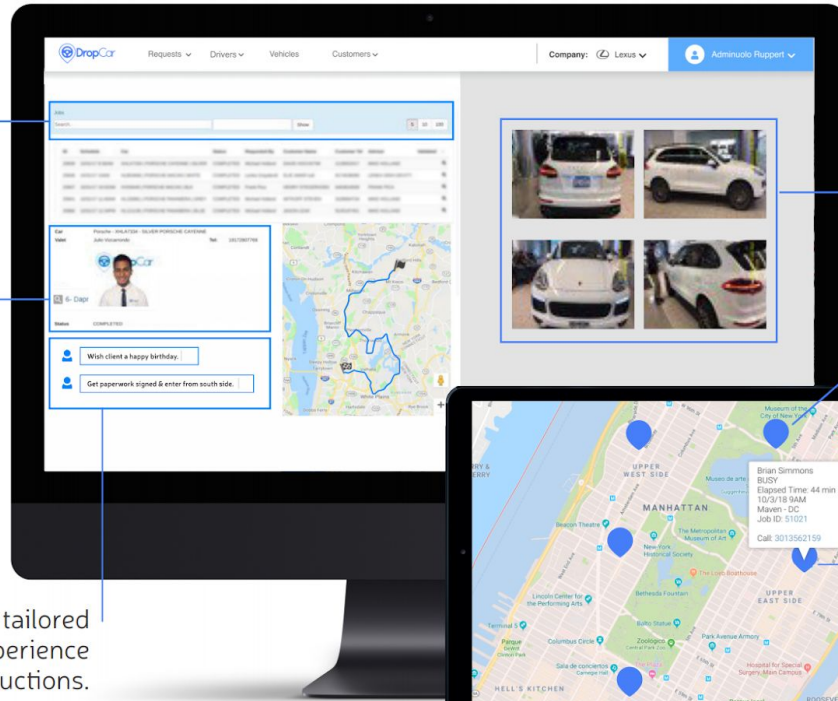

100% Visibility & Control at Every Step

Searchable trip history.

Manually assign jobs, or let our system automate.

Deliver a tailored customer experience with driver instructions.

Verify driver photos with built in geofencing.

See all drivers & ETAs in real-time.

Optimize driver efficiency.

Arm your support team with precise field info.

Experience Driven Technology

We don't just build technology. We help manage drivers & logistics coordinators who use the technology **everyday** for a hand selected group of mobility use cases.

- 500,000+ B2B & consumer jobs completed
- 1,300,000+ service hours managed
- 25,000,000+ miles driven
- 100% of learnings are integrated directly back into our tech platform
